At PwC, we are in the business of transformation, known for our commitment to achieving results, and helping our clients gain a better understanding of what their customers need, and to organise their business with the customer at its heart. We combine strategy, technology and management consulting expertise to help organisations succeed, with an understanding of how business works and a knowledge of how the right technology in the right place can create competitive advantage. We can help you understand how you can better serve your customers and deliver more meaningful experiences for them, and create growth through customer connections.

Together we can create long term sustainable profitable growth for your business by better connecting you with your customers. By transforming your strategy, operations and experience, accelerated through the adoption of technology, we'll help you to adapt to your customers' current and future needs.

At PwC, we have been on our own global technology-enabled transformation journey over the past 4 years, as we have transitioned to cloud, globally, across our major business functions. Our 250,000 people have experienced transformation first-hand, and we have a deep understanding of how to bring your people and organisation with you in delivering change at scale. We would be delighted to share the benefit of this experience with you.

SEND Insurers today operate in a fast-changing risk landscape with new and evolving risks. Underwriting teams need to work smarter and act quickly to differentiate. But commercial and specialty risks are complex, and it takes time to wrangle vast amounts of data into good shape and analyse risk expertly.

That's why we created Send Underwriting Workbench: a single platform supporting the underwriting process from submission to bind, and beyond. A single platform for managing new business, renewals and endorsements.

A one-stop desktop for underwriters – data, documentation, decision points all in one place. Advanced automation to optimise processes and ingest & enrich data while removing process waste. Send customers report 50% reduction in processing time and 30% more time to focus on core work.

 **hyperexponential** hyperexponential are transforming the insurance industry through the power of decision intelligence. Pricing decisions are the biggest decisions insurers make – but most are still pricing 21st century risks with 20th century tools. With a combined 30 years of experience designing pricing and analytics ecosystems in the insurance industry, our co-founders saw an opportunity to transform the market.

They saw the need for a scalable way to turn small, sparse, or fragmented data into new insights that drive smarter decisions - and realised that this is how the market leaders of tomorrow will develop their competitive edge. So they built hyperexponential, and the world's first pricing decision intelligence platform, hx Renew

Novidea is the leading Insurtech provider of a cloud-native, data-driven insurance management system. Using an open API architecture, Novidea's software platform enables brokers, agents, MGAs, and carriers to modernise and manage the customer insurance journey, end-to-end, and drive growth across the entire insurance distribution lifecycle. The Novidea platform, built on Salesforce, provides a complete ecosystem spanning every aspect of an insurance business, including a 360-degree view of the customer, and all stakeholders, enabling full integration between customer-facing policy transactions and the middle and back offices. Brokers, agencies, and MGAs extract more value from their customer and policy data with actionable intelligence from any device, anywhere. Novidea supports more than 100 customers across 22 countries.
